Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08-30-2006 has been entered.

Claim Objections

Claim 46 is objected to because of the following informalities: in line 9, "inner sheath" should be changed to –inner shaft— The phrase "rotatable along a line that is parallel to a longitudinal axis of the outer sheath" is unclear; it is suggested to change it to rotatable about an axis parallel or coincident with the axis of the sheath. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3731

Claims 46-60 are rejected under 35 U.S.C. 102(b) as being anticipated by Olson, et al.-5906619.

Olson discloses a device including an outer sheath 32, an inner shaft 34 having runners 42 at the distal end for holding a distal protection device (stent), a manifold 50 having a rotatable actuator gear 52 which when rotated engages gear teeth on the proximal end of the sheath to retract it proximally and allow the stent to self-expand. The rotation of the button 52 is about an axis coincident with the axis of the sheath.

Claims 46-60 are rejected under 35 U.S.C. 102(e) as being anticipated by Gilson, et al.-6669716.

Gilson discloses a device including an outer sheath 20 housing an inner shaft 2 having a section at its distal end for receiving a stent (distal protection device). The proximal ed of the shaft has a manifold attached thereto which has a rotatable button 53 which when rotated about an axis parallel to the axis of the sheath causes retraction of the sheath relative to the shaft and allows the stent to self-expand.

The above rejections are given since the stent would be a protection device capable of protecting a weakened vessel.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/053,143

Art Unit: 3731

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 46-60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turovskiy, et al.-2002/0128679 in view of either Olson, et al.-'619 or Gilson, et al.-'716.

Turovskiy discloses the invention as claimed including a retractable outer sheath attached to an actuator button for retracting the outer sheath relative to an inner shaft with a distal protection filter. However, the specific actuation button assembly was not disclosed. However, both Olson and Gilson disclose the same actuator button assemblies as the applicant is claiming. It would have been obvious to have used the actuators of either Olson or Gilson as these actuators avoid inadvertent linear

movement of the handle to the protection device or system. See Olson, et al. col. 2 lines 12-36.

Response to Arguments

Applicant's arguments with respect to claims 46-60 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K. Dawson whose telephone number is 571-272-4694. The examiner can normally be reached on M-Th 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T. Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
